Solutions to Improve

www.titustekform.com.au

Everything you need in one place

Titus Tekform is a member of the Titus Group, a privately-owned European brand with global reach and over 65 years experience in the development and manufacture of furniture fittings and precision component solutions.

With dedicated Architectural Consultants, and on-staff tradespeople, Titus Tekform can help make specifying products simple and cost effective.

Who Are Titus Group?

As a manufacturer-distributor, we listen to our customers and use their feedback to continuously improve our products and service.

Titus is owned and managed from the UK and employs more than 800 people across engineering, manufacturing and distribution, with customers in over 60 countries. Titus products are used in whitegoods, furniture, automotives and many more products distributed by some of the world's biggest brands.

We pride ourselves on our totally integrated engineering program and our world-leading engineering teams produce consistent and repeatable quality with unique product advantages.

Our Brands

Our carefully selected product range includes superior Titus hinges, dampers, connectors and furniture fittings; the extensive Tekform Double Wall and Single Wall drawer family; Stefano Oriati LED lighting, handles and decorative surfaces; as well as a comprehensive array of innerware, sinks, taps, appliances, adhesives, abrasives, fasteners and edgebanding.

Titus

Engineered Fittings & Precision Components

Innovation

We deliver consistent product improvement with in-house Totally Integrated Engineering incorporating Product Design, Manufacturing Technologies and Manufacturing Operations.

Tekform Titus+

Functional Fittings & Cabinetry Solutions

Technical Expertise

We have extensive knowledge on trends and designs with over 40 years in the Australian kitchen industry, including on-staff trades people.

Stefano Orlati Titus+

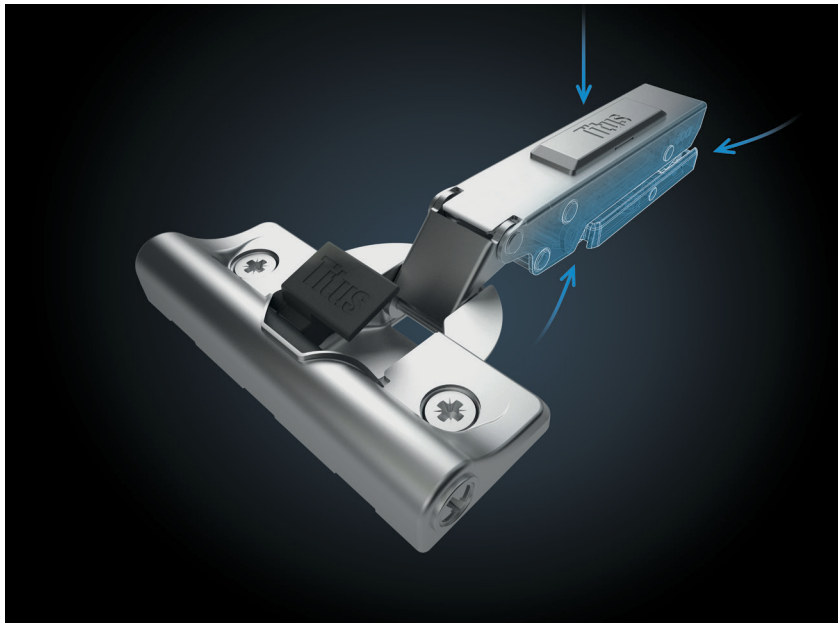

Decorative Hardware, Surfaces & Lighting

Reliability

We provide Quality Assurance with ISO 9001 and European testing certificates, guaranteed same day dispatch nationwide, and continuous product and service improvement.

Your Time.

Titus T-type Hinge

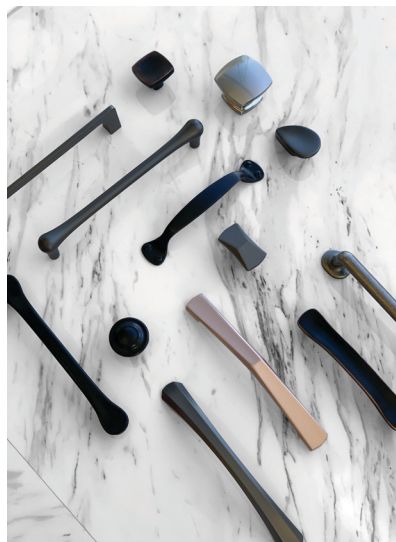

Fast and easy cabinet assembly with 3Way mounting.
Consumer-preferred 'Confident Close' adjustable damping.
Highly tolerant design assures lifetime performance.
Wide scope for door thicknesses from 15mm on.

Titus

CAPRI Profiles

European-style handleless kitchens.
Six profile options in six different finishes.
Solutions for base, wall and tower cabinets.
Quick and easy cleaning.

Designer Handles

Inspired by the latest European kitchens and bathrooms.
Now available in an expanded range with premium finishes.
Core portfolio of cabinet handles with a focus on superior quality and service.

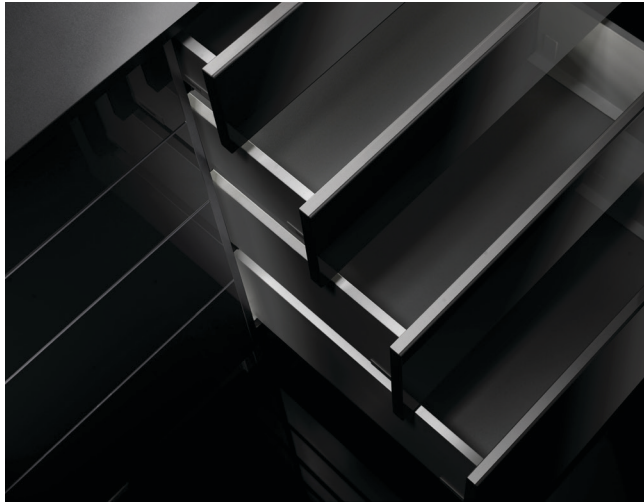

LED Lighting

Our comprehensive range includes LED downlights, strip lights, profiles, sensors, transformers, accessories and tuneable LED strip lights.
Made to Measure and DIY options available.

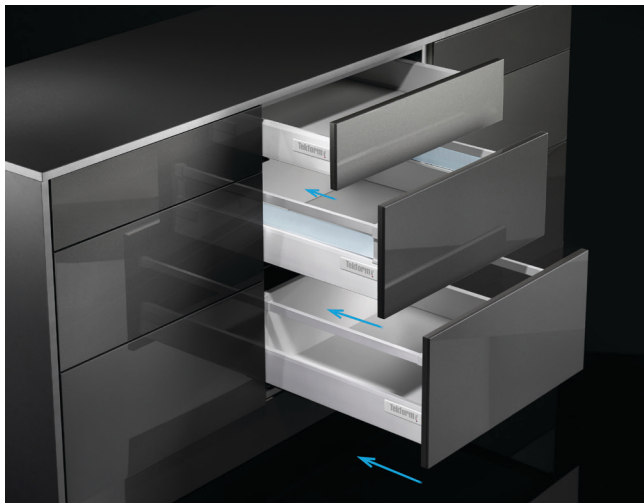

Stefano Orlati Titus+

Our Priority.

Tekform SDWD Slimline Drawer

Sleek look with narrow 14mm sides.
Efficient, intuitive installation.
Different design options and finishes.
Optional cutlery trays and non-slip matt available.

Tekform DWD Drawer

European-designed double wall drawer system.
'EasyFix' front panel connectors.
'Confident Close' with integrated Titus damping technology.

Slimline SDWDG Glass Drawer

8mm tempered glass sides,
Interchangeable with the Tekform DWD
and SDWD drawers.
Ideal for wardrobe and pantry
applications.

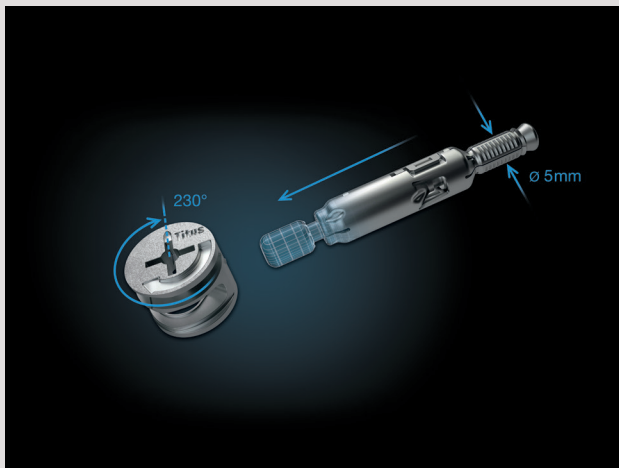

Tekno Soft Close Bins & Hampers

Easily removable bins for use with Double Wall Drawer systems.
Fully concealed liners.
Compatible with the Tekform drawers.

PVD Coloured Sinkware

Hand fabricated sinks available in Gun Metal, Brass, Copper or Black seamless pressed finishes.
Coloured using superior Physical Vapour Deposition.

Titus Quickfit TL5 Connectors

Strong and reliable joint.
High drilling tolerances.
Toolless insertion technology for 5mm dowel holes.

Titus Push Latch

Effortless touch opening for furniture doors and drawers.
Available with linear or cruciform mounting plates.
Adjustable depth +/-4.5mm.

Opti Board Range

Made to Measure doors and panels manufactured in-house to Australian standards.

Pre-fabricated to your specifications so you only pay for what you need.

Premium E0 recyclable OptiGlaz High Gloss Acrylic and OptiMatt PET Matt board.

Quick lead times to optimise your production capacity.

Sliding & Bi-Fold Door Systems

We offer sliding door systems for both top and bottom running tracks.

Set 200 by Titus provides a non-handed bottom running system available with Titus proprietary damping technology, Titusoft SD100s, for smooth, consistent damping.

In conjunction with the T-type Hinge, Set F400 provides a top-hung soft close folding door system.

What are the real benefits of T-type?

Our engineers spend a lot of time developing ways to make the T-type hinge perform in a huge range of conditions and applications and we use phrases like ‘low hinge cup depth’, ‘high tolerance’ and ‘3Way snap-on’ to describe the benefits of T-type to your work processes. But what do they actually mean in practice?

Fast and easy mounting

T-type uses 3Way snap-on mounting, which is the name we give to the incredibly simple process of attaching the T-type hinge to the mounting plate. Unlike most hinges, the T-type can be clipped to the mounting plate from the front, back or directly on top – regardless of how many hinges you need to mount. This is particularly useful for longer doors, like pantries and wardrobes and the installation process is so simple, even people with no trade experience can do it in no time at all. T-type is likewise forgiving, offering smooth and consistent performance even when misaligned. And since only every second or third hinge needs to have integrated damping for soft close performance, it’s also the cost-effective option.

Universal application

Low, tall, thick or thin – since the T-type hinge only requires a drilling depth of 11.7mm and uses a rigid design that retains optimal performance in doors up to 26mm thick, it doesn’t matter what your door

dimensions or weight may be. T-type can be used for kitchen, bedroom and all other furniture, which means less components you need to keep on hand. T-type is also available for pie-cut corner cabinets, with a double lock opening system to avoid hitting adjacent cabinets and take up as little room as possible.

World-leading soft close technology

Titus damping products are used in major brands across leading technology, whitegoods and automobile industries world-wide, so it's no surprise that particular attention was given to the soft close damping mechanism in the T-type hinge. Unlike most hinges, the Glissando damping mechanism in the T-type hinge is located in the hinge cup – which allows consistency across the different T-type variations and applications and simple adjustment with the turn of a screw. Titus Consumer Preferred soft close is engineered for reliable performance in any situation, which is why they are the supplier of choice for damping applications required to withstand extreme temperatures, like ovens and freezers. So you can be confident that your customers will be happy with the performance for the lifetime of their furniture and cabinets.
